June 16, 1986

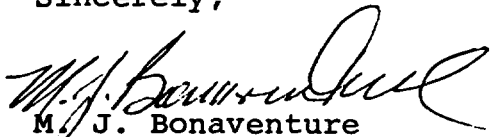

Mr. Nicholas Longo
On-Scene Coordinator
Attn: 5HE-12
U.S. E.P.A. Region V
230 South Dearborn St.
Chicago, IL 60604

Dear Mr. Longo:

Ethyl Petroleum Additives plans to install six (6) pilings to support a platform for an air dryer in the area immediately south of the air compressor building (NT) which is within the area designated as significantly contaminated with 2,3,7,8-TCDD. This work will not require the handling or movement of the soil in the area. The pilings will simply be driven through the rock covering into the ground. This work is expected to begin the week of July 15, 1986, and is expected to be completed in one day.

All previously approved plans that address health and safety concerns will be utilized. If you have any questions on this matter please contact me at 618-274-4000.

Sincerely,

M. J. Bonaventure
Environmental Supervisor
